Commission on the Status of Women
Resumed forty-fifth session
9-11 May 2001
Agenda item 4 (a)
Thematic issues: Women, the girl child and human immunodeficiency virus/acquired immunodeficiency syundrome (HIV/AIDS)

Draft agreed conclusions submitted by the Chairperson on the basis of informal consultations

Women, the girl child and human immunodeficiency virus/acquired immunodeficiency syndrome (HIV/AIDS)

1. Women play a vital role in the social and economic development of their countries. It is a profound concern that by the end of 2000, 36.1 million people were living with HIV/AIDS, and of those infected, 95 per cent were living in developing countries, and 16.4 million were women. The proportion of women infected with HIV is increasing and in sub-Saharan Africa women constitute 55 per cent of all adult HIV infected, while teenage girls are infected at a rate of five to six times greater than their male counterparts; (AGREED)

2. **[[Full enjoyment of all human rights by women and girls, including the right to development, is of crucial importance in preventing further spread of HIV/AIDS.]** The majority of women and girls, do not **fully** enjoy **equal,** social, economic **and cultural rights [in equal conditions with men], [particularly]** to education, **the highest attainable standard of physical and mental health and social security, especially in developing countries,** and these inequalities begin early in life and render women and girls **more vulnerable in the area of** sexual and reproductive health; thus increasing their risk and vulnerability to HIV infection and therefore suffer disproportionately from the consequences of the HIV/AIDS epidemic;]

01-35583 (E) 030501

New 2:

Full enjoyment by women and girls of all human rights, civil, cultural, economic, political and social, including the right to development – which are universal, indivisible, interdependent and interrelated, is of crucial importance in preventing further spread of HIV/AIDS. The majority of women and girls, do not fully enjoy their rights particularly to education, the highest attainable standard of physical and mental health and social security, especially in developing countries. These inequalities begin early in life and render women and girls more vulnerable in the area of sexual and reproductive health; thus increasing their risk and vulnerability to HIV infection and their disproportionate suffering from the consequences of the HIV/AIDS epidemic; (27/04/01, AGREED AD REFERENDUM)

3. Poverty, negative and harmful traditional and customary practices that subordinate women in the household, community and society render women especially vulnerable to HIV/STI. Millions of women and girls lack access and/or have insufficient access to health care, medication and social support in general, including in the case of sexually transmitted infections/ HIV/AIDS; (AGREED)

4. The Commission on the Status of Women has taken into account the recommendations on women, the girl child and HIV/AIDS as addressed in the following documents: the Beijing Platform for Action,[1] the Programme of Action of the International Conference on Population and Development[2]; the Copenhagen Programme of Action[3], the outcome documents of the 21st, 23rd and 24th special sessions of the United Nations General Assembly[4], the United Nations Millennium Declaration,5 the Commission on the Status of Women's Agreed conclusion on women and health[6], its resolution 44/2 ; (AGREED)

9. The highest level of political commitment to the empowerment and advancement of women and to the prevention, research, care and treatment of sexually transmitted infections, especially HIV/AIDS, must be secured; (AGREED)

10. In order to accelerate the implementation of the strategic objectives of the conferences and documents previously mentioned in para 3, especially of those objectives related to women, the girl child and HIV/AIDS, the Commission recommends that the following actions be taken: (AGREED)

Actions to be taken by Governments, the United Nations system and civil society, as appropriate

1. Empowerment of women

(a) The rapid progression of the HIV/AIDS pandemic, particularly in the developing world, has had a devastating impact on women. The unequal power relationships between women and men, in which women often do not have the power to insist on safe and responsible sex practices, and lack of communication and understanding between women and men on women's health needs, *inter alia*, endanger women's health, particularly by increasing their susceptibility to sexually transmitted infections, including HIV/AIDS; (AGREED)

(b) Responsible behaviour and gender equality are among the important prerequisites for its prevention; (AGREED)

(c) Further promote the advancement and empowerment of women and **[women's full enjoyment of all human rights, including the right to development] and [their right to have control over and decide freely and responsibly on matters related to their sexuality],** as well as access to health information and education, health care and health services which are critical to increase the ability of women and young girls to protect themselves from HIV infection; (27/04/01)

(d) Ensure that the sexual health and reproductive rights of women of all ages as defined-in paragraphs 94, 95 and 96 of the Beijing Platform for Action is an essential part in efforts to promote women's empowerment; (27/04/01, AGREED AD REFERENDUM)

(e) Focus national and international policies towards the eradication of poverty in order to empower women to better protect themselves from the spread of the pandemic and to more effectively deal with the adverse effects of HIV/AIDS; (AGREED)

(f) Alleviate the social and economic impact of HIV/AIDS on women who in their roles as food suppliers and traditional care givers are primarily affected by negative consequences of the pandemic like reduced labour force and breakdown of social service systems; (AGREED)

(g) Reaffirms the equal rights of women and the girl child infected and affected by sexually transmitted infections/HIV/AIDS to have access to health, education and social services and to be protected from all forms of discrimination, stigma, abuse and neglect; (AGREED)

(h) Also reaffirms the human rights of girls and women to equal access to education, skill training and employment opportunities as a means to reduce their vulnerability to sexually transmitted diseases/HIV; (AGREED)

(i) Urges Governments to take all necessary measures to empower women and strengthen women's economic independence and protect and promote full enjoyment of all human rights and fundamental freedoms in order to allow women and girls to better protect themselves from sexually transmitted infections/HIV; (AGREED)

(j) Address and reduce the increased HIV/AIDS risks, vulnerabilities, and impact on women and girls, including in conflict situations, through gender-sensitive economic, legal and social services and programmes, including integration of HIV/AIDS prevention and care services into minimum essential health care packages; (AGREED)

(k) Strengthen concrete measures to eliminate all forms of violence against women and girls, including harmful traditional and customary practices, abuse and rape, battering, and

trafficking in women and girls, which aggravate the conditions fostering the spread of HIV/AIDS, through, *inter alia*, the enactment and enforcement of laws, as well as public campaigns to combat violence against women and girls; (AGREED)

(l) Take steps to create an environment, that promotes all human rights, compassion and support for people infected/affected by HIV/AIDS, including through introducing and/or reviewing legislation with a view to striving to remove discriminatory provisions and provide the legal framework that will protect the rights of people living with HIV/AIDS, particularly of women and girls, and enable those who are vulnerable to have access to appropriate voluntary and confidential counselling services and to encourage efforts to reduce discrimination and stigmatization; (AGREED)

(m) Further develop and fully integrate a gender perspective into national regional and international HIV/AIDS programmes and strategies taking into account, *inter alia*, sex and age disaggregated data and statistics, with a particular focus on gender equality; (AGREED)

(n) Take measures to promote and implement women's equal access to and control over economic resources, including land, property rights, right to inheritance, regardless of their marital status in order to reduce the vulnerability of women in the context of the HIV/AIDS epidemic; (AGREED)

(o) Provide women and girls, including those in marginalized groups, with equal access to quality education, literacy programmes, health care and health services, social services, skills training and employment opportunities, and support capacity-building and the strengthening of women's networks and protect them from all forms of discrimination, including racial discrimination, stigma, abuse and neglect in order to reduce their risk and vulnerability to HIV/AIDS and alleviate the impact on those infected and affected by HIV/AIDS; (AGREED)

2. Prevention

(a) Governments, relevant United Nations agencies, funds and programmes, and intergovernmental and non-governmental organizations, individually and collectively, should make efforts to place combating HIV/AIDS as a priority on the development

agenda and to implement multi-sectoral and decentralized effective preventive strategies and programmes, especially for the most vulnerable populations, including women, young girls and infants, also taking into account prevention of mother-to-child transmission; (AGREED)

(b) Governments, with the assistance of relevant United Nations agencies, funds and programmes, must adopt a long-term, timely, coherent and integrated AIDS prevention policy, with public information, life skills-based education programmes specifically tailored to the needs of women and girls adapted to their social cultural context and sensitivities and the specific needs in their life cycle; (AGREED)

(c) Intensify efforts to determine the best policies and programmes to prevent women and young girls from becoming infected with HIV/AIDS, taking into account that women, in particular young girls, are socially, physiologically and biologically more vulnerable than men to sexually transmitted infections; (AGREED)

(d) **[Recognizing that various forms of the family exist, take measures to integrate a [family-based approach/families in all its forms] as part of programmes aiming at providing prevention, care and support to women of all ages/people infected/affected by HIV/AIDS;]**

New (d)

Take measures to integrate, *inter alia,* a family-based approach in programmes aiming at providing prevention, care and support to women and girls infected and affected by HIV/AIDS; (27/04/01, AGREED AD REFERENDUM)

(e) Ensure equal and non-discriminatory access to accurate, comprehensive **[and culturally sensitive]** information, to prevention education on reproductive health, and to voluntary testing and counselling services and technologies within a gender-sensitive framework and with particular emphasis on adolescents and young adults; **[taking into account, where appropriate, the responsibilities, rights and duties of parents and legal guardians to provide, in a manner consistent with the evolving capacities of the child, appropriate**

directions and guidance [in the exercise by the child of the rights recognized in the Convention on the Rights of the Child;]]

New (e)

(g) Promote gender equality in relationships, and provide information and resources to promote informed, responsible and safe sexual behaviour and practices, mutual respect and gender equality in sexual relationships; (AGREED)

(i) Encourage active involvement of men and boys through, *inter alia*, youth-led and youth-specific HIV education projects and peer-based programmes, in challenging gender stereotypes and attitudes as well as gender inequalities in relation to HIV and AIDS, as well as their full participation in prevention, impact alleviation and care. Design and implement programmes to encourage and enable men to adopt safe and responsible sexual

and reproductive behaviour and to use effectively methods to prevent unwanted pregnancies and sexually transmitted infections, including HIV/AIDS; (AGREED)

(j) Intensify especially in the most affected countries, education, services, community-based mobilization and information strategies to protect women of all ages from HIV and other sexually transmitted infections, including through the development of safe, affordable, effective and easily accessible female-controlled methods, including such methods as microbicides and female condoms that protect against sexually transmitted infections and HIV/AIDS, as well as voluntary and confidential HIV testing and counselling and the promotion of sexually responsible behaviour, including abstinence and condom use; (AGREED)

(k) Strengthen sustainable, efficient and accessible primary health care systems which serve to support prevention efforts; (AGREED)
